## SUMMARY

Full stack web developer currently undergoing the Associate of Science program at Wake Tech. Further, I will be graduating from the University of Chapel Hill Full-Stack Bootcamp in September, with skills in JavaScript, CSS, and React.js. Building web applications is my passion and I am looking for a position where I can utilize my skills to create a great user experience. During a recent project, I developed a web application to help traders manage their portfolios. As a member of the development team, I created a MERN app that allows users to create portfolios, add stocks, and view their portfolios. I'm looking forward to using my skills to improve the users' experience.
